

I agree partially with this proposal. I am in favor of a no-code entry level license with limited HF priveleges on phone and CW. However I am not in favor of any 40 meter phone priveleges. That band is way to crowded already. Perhaps we could do as the Japanesese do and give some portion of 15 meter SSB to no-code technician licenses. As for CW access, I am favor of all the bands memtioned in the petition and would be in favor of adding a portion of even 20 meters to help them get interested in CW.
